PROFESSIONAL SUMMARY:

Prior accountant with passion for technology, with a knack for numbers and creative problem solving. Experience using software analytic tools for reporting and programming languages to create applications. Seeking a Software Developer position with room for creativity, new ideas, and continuous learning.

PROGRAMMING SKILLS: JavaScript, JQuery, Node.js, HTML, CSS, React, MySQL, SQL, MongoDB, APIs, Firebase, Ruby, Java, and Bootstrap

SOFTWARE TOOLS: Tableau, Microsoft Excel (pivot tables, macros), Word, PowerPoint, Access, Adobe Acrobat, Outlook, Tax Wise, Tax Cut, ProSystem fx ® Engagement, PPC Checkpoint tools Great Plains, and QuickBooks

SOFTWARE QUALITY ASSURANCE: During my work at CAI Logistics the company upgraded its operational software and added new features. As an accountant in charge I tested the system to make sure that financial statements would not be distorted due application errors. I collected application errors, submitted tickets with detailed descriptions of the problems, and reviewed once the issues were fixed.

APPLICATIONS BUILT:

SSV Travel - https://github.com/vias2019/app-ssv (https://app-ssv.herokuapp.com/) - travel planner, pulls information about itinerary, helps to make a decision when to buy tickets, provides forecast in form of a chart. Technologies used: Sabre API, Google charts, MySQL, Bootstrap, and Heroku

My-tutor - https://my-tutoring.herokuapp.com (https://my-tutoring.herokuapp.com/)– Tutoring scheduler where a teacher sends invitation to a student, a student accepts invitation by registering online. A teacher in a teacher view account will assign to student's profile a class name, date and time, and tuition due. A student in student view account will pay tuition and see a calendar with his class schedule. Technologies used: Bootstrap, Password, Credit Card, MongoDB, React, and Heroku

Buy Together - https://github.com/vias2019/Group-Project-1 (https://vias2019.github.io/Group-Project-1/) - ecommerce website where customer can search and select a product to buy with a feature to share a product price between groups of people. Technologies used: Etsy API, Firebase, Bootstrap, and Bootstrap modals
